Professional Summary Technically proficient Customer Service Representative blending proactive BPO experience with deep expertise in hardware, software, and mobile device ecosystems. Certified Google IT Support adept at translating complex technical troubleshooting—including operating system modifications, system-level configurations, and hardware diagnostics—into clear, efficient customer solutions. Highly prepared to drive first-call resolution, navigate diverse technical issues, and elevate client satisfaction within fast-paced telecommunications and technical support environments.

Experience

Customer Service Representative

Business Process Outsourcing (BPO) Duration: 8 Months

- Delivered comprehensive, proactive support for a US financial account, efficiently managing high-volume inbound inquiries and safeguarding sensitive client data.
- Resolved complex customer complaints through active listening, strategic troubleshooting, and thorough follow-up.
- Navigated proprietary systems while strictly adhering to client compliance guidelines, security protocols, and company service level agreements.
- De-escalated tense situations by providing empathetic, professional communication, effectively translating complex procedural steps into easily understandable terms for clients.

Technical Support and Maintenance

Local Computer Cafe Duration: 1 Year

- Diagnosed and resolved critical hardware and software issues, including Blue Screen of Death (BSOD) errors, system driver conflicts, and OS malfunctions, significantly minimizing system downtime.
- Performed regular preventive maintenance, complete hardware disassembly and assembly, and system optimization to ensure seamless daily operations.
- Configured and modified system software, applying deep technical knowledge to optimize performance across various devices and hardware architectures.
- Provided on-the-spot technical assistance to end-users, quickly adapting troubleshooting methods to match diverse levels of technical literacy.

Skills

- Technical Troubleshooting: Hardware diagnostics, software troubleshooting, operating system modifications, system driver configuration, mobile and desktop device architecture.
- Customer Support: Issue de-escalation, proactive problem-solving, SLA adherence, cross-cultural communication, high-volume call handling.
- Software and Applications: Microsoft 365 (Word, Excel), Email Management, Canva, Adobe Photoshop, CapCut.
- Professional Attributes: Rapid learner, highly autonomous worker, collaborative team player, excellent time and task management.
